**SKYLER C3 LIQUIDITY DISCOVERY SOLUTION WINS THE 2007 BANKER TECHNOLOGY AWARD FOR ALGORITHMIC TRADING INNOVATION**

***Skyler receives the Banker Technology Award for real-time order book capability and ability to drive new trading strategies.***

Walnut Creek, CA – May 31, 2007 – Skyler Technology, Inc., an innovator in providing high performance trading solutions, is proud to announce that its Skyler C3 Liquidity Discovery Solution has garnered the international industry-renowned Bankers Technology Award for the most innovative Algorithmic Trading Solution of the 2007. For this Award, The Banker recognizes firms that enhance all aspects of algorithmic trading, including development and deployment.

“This prestigious award is a great endorsement of Skyler’s C3 Liquidity Discovery Solution and Skyler’s positioning as a provider of highly focused high performance trading solutions,” touts Steve Cooper, Chairman and CEO of Skyler. He continues, “the openness and flexibility of the C3 Liquidity Discovery Solution offer customers the ability to develop new and highly innovative trading strategies. We are proud that this unique value proposition and Skyler’s customer oriented development approach were recognized by The Banker with this award.”

Skyler’s C3 Liquidity Discovery Solution is a plug’n’play component that addresses the high performance trading need to capture, aggregate, access, and act upon highly fragmented liquidity. It provides clients deeper insights into the different liquidity pools. The system also supports the integration of custom indicator calculations as well as algorithms that can trigger trades faster. As a result, customers who use the Skyler C3 Liquidity Discovery Solution are able to understand and act on liquidity information faster to achieve better prices and higher fill rates, which ultimately results in higher trading efficiency.

This offering can be easily integrated into existing trading systems. It can be used to power algorithmic trading platforms, smart order routing applications, calculation engines, and compliance servers.

Skyler Technology, Inc. develops high performance trading solutions for faster and smarter trading. The Skyler C3 Solutions source liquidity, trigger smarter trading decisions, and route orders to the venues with the best prices. The Skyler C3 Liquidity Discovery, Algorithmic Container, Order Routing and Compliance Solutions are focused on specific customer needs and emphasize flexibility, ease of use, and simplicity of integration. They combine powerful, low-latency in-memory data processing technologies with market specific business logic modules. This combination results in improved trading efficiency and powerful and innovative trading systems.

Skyler Technology, Inc. is a privately held company located in Walnut Creek, California.
